PROFESSIONAL SUMMARY

Computer and Data Science student at Alexandria University with hands-on experience developing scalable web applications using Laravel, PHP, React, and MySQL. Passionate about backend development, RESTful APIs, SaaS architecture, and building real-world business solutions. Experienced in authentication, role-based access control, task scheduling, reporting, and modern full-stack development workflows.

EDUCATION

Bachelor's Degree in Computer and Data Science

Faculty of Computer and Data Science, Alexandria University

Expected 2027

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, Java, C++

Backend Development: Laravel 12, RESTful APIs, Laravel Sanctum, Authentication & Authorization, MVC Architecture, Eloquent ORM, Task Scheduling, API Development

Frontend Development: React, Vite, Tailwind CSS, Axios

Databases: MySQL, Database Design, Relational Database Modeling

Tools & Technologies: Git, GitHub, Postman, VS Code

PROJECTS

SaaS Travel Agency Management System

Laravel 12, React, MySQL, Sanctum

Designed and developed a multi-tenant SaaS platform for travel agencies to manage reservations, employees, and daily operations through a modern REST API architecture.

- Built RESTful APIs using Laravel
- Implemented multi-tenant architecture supporting multiple companies
- Developed role-based authorization (Admin, Manager, Employee)
- Built a centralized reservation system supporting flights, hotels, cruises, visas, insurance, transportation, and tickets
- Developed employee management modules including attendance tracking, leave requests, and task management
- Implemented real-time notifications
- Generated PDF and Excel reports
- Built dashboards tailored to different user roles

Technologies: Laravel, React, Sanctum, MySQL, Tailwind CSS, Pusher, jsPDF, XLSX

Foodie – Food Ordering Platform

Laravel 12, React, MySQL

Developed a complete food ordering platform connecting restaurants with customers through a decoupled Laravel API and React frontend.

- Developed restaurant and menu management
- Built shopping cart and ordering workflow

- Implemented automated order tracking using Laravel Scheduler and Artisan Commands
- Created payment simulation functionality
- Developed restaurant review and rating system
- Built restaurant sales reports with charts
- Implemented order status tracking

Technologies: Laravel, React, Sanctum, MySQL, Scheduler, Tailwind CSS, Recharts
